PROFESSIONAL PROFILE

Final-year Bachelor of Science in Information Technology student at North-West University with a strong interest in Cybersecurity, Artificial Intelligence, Cloud Computing and Software Engineering. Experienced in leading tech projects, developing secure enterprise networking solutions and building intelligent software applications. Recognized through Top 3 and Top 5 national hackathon achievements, student leadership and practical industry exposure. Seeking a graduate opportunity to contribute technical expertise while continuously expanding my skills.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C#, C++, SQL
- Web Development: HTML5, CSS3, JavaScript, Flask
- Artificial Intelligence: Scikit-learn, Machine Learning, PyTorch (Learning), Google Colab
- Networking & Cybersecurity: Cisco Packet Tracer, VLANs, Routing & Switching, ACLs, Linux
- Database: MySQL, Firebase, Database Design & Authentication
- Developer Tools: Git, GitHub, Visual Studio Code, Power BI, Blazor, Render (Learning)

PROFESSIONAL EXPERIENCE & INDUSTRY EXPOSURE

Blue Networks & Infrastructure (BNI)

Industry Exposure Programme

- Assisted with Cisco switch configuration and enterprise networking infrastructure deployment.
- Gained practical exposure to Linux environments and server administration.
- Participated in database migration activities.
- Observed Cisco IP Telephony implementation and Agile project workflows.
- Strengthened understanding of enterprise IT operations, teamwork and professional communication.

TECHNICAL PROJECTS

Cloud-Based AI Phishing Detection Platform (Current)

Developing a cloud-based phishing detection platform using Python, Flask and Scikit-learn. Building machine learning models to classify phishing URLs, applying secure software development practices and preparing the application for cloud deployment.

Enterprise Network Infrastructure Design & Security Project — Project Leader | 95%

Led the planning, design and implementation of a secure enterprise network. Configured VLANs, Inter-VLAN routing, DHCP and ACLs using Cisco Packet Tracer. Produced technical documentation, tested network functionality and achieved a final mark of 95%.

CarSureFor — Vehicle Service Management System

Designed the core relational database architecture supporting customer records, inventory and transactions. Implemented database authentication, collaborated on front-end integration, produced UI/UX documentation, and participated in testing and optimization.

LEADERSHIP & ACHIEVEMENTS

- Geekulisa National Hackathon — Team Leader | Top 3 Overall Finalist: Led a multidisciplinary team, coordinated technical delivery and presented an innovative solution under strict deadlines.

- Security Summit National Hackathon — Top 5 National Finalist: Collaborated in a national cybersecurity competition solving real-world security challenges.
- Student Campus Council — Portfolio Committee Member: Supported student initiatives while developing leadership, teamwork and communication skills.

TECHNICAL PORTFOLIO

Designed and developed a responsive portfolio website using HTML5, CSS3 and JavaScript to showcase projects, hackathon achievements, GitHub, LinkedIn, CV and technical skills.

EDUCATION

North-West University

Bachelor of Science (BSc) Information Technology — Expected Graduation: 2026
